

Industrial Electrical Rubber Busbar Insulation Pad

Rubber Busbar Insulation Pad is a kind of auxiliary safety appliance, generally laid on the ground of the distribution room, in order to enhance the operator's insulation to the ground when the live operation of the circuit breaker or isolation switch, to prevent the harm of the contact voltage and step voltage to the human body.

Rubber Busbar Insulation Pad is a kind of auxiliary safety appliance, generally laid on the ground of the distribution room, in order to enhance the operator's insulation to the ground when the live operation of the circuit breaker or isolation switch, to prevent the harm of the contact voltage and step voltage to the human body.

Product Parameter of the Industrial Electrical Rubber Busbar Insulation Pad:

- ①Product name: **Industrial Electrical Rubber Busbar Insulation Pad**
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive
- ⑦Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc
- ⑧Delivery: 30 -50days after sample confirmation
- ⑨Sample: 25-30 days
- ⑩Payment: 30% deposit, 70% payment before shipment
- ⑪Package: PE bags, Cartons,Pallet
- ⑫Payment Terms: T/T,L/C and so on.
- ⑬Shipment Way: Vessel,Air,Express etc.

Product Feature AND Application of the **Industrial Electrical Rubber Busbar**

Insulation Pad:

Electrical rubber busbar insulation pad High temperature resistant insulation, can be laid on the ground near the low voltage switch, the operator stands on it, instead of using insulating gloves and boots. Insulation test should be carried out regularly. There are measures to prevent bus eddy current and dynamic thermal stability caused by electromagnetic induction. Measures to reduce eddy current or hysteresis losses should also be described.

Below is our industrial electric power silicone rubber parts:
